Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 June 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-4,6-13 and 15-21 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-4,6-13 and 15-21 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
- If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

DETAILED ACTION

Response to Arguments

1. The prior Office Action dated 6/18/03 was submitted in response to a request for consideration submitted 3/18/03. However, a Supplemental Amendment was submitted 4/4/03 but was not entered properly. The Supplemental Amendment has now been entered; therefore, please disregard the previous Office Action because it does not take the Supplemental Amendments into consideration.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2, 4, 6, 8-11, 13, 15, and 17-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fujita et al (5,974,219) in view of Russo et al (5,701,383).

Regarding claim 1-2, 4, 10-11, and 13, Fujita et al discloses an indexing device that indexes recordings of activity based on a user input (col. 11, lines 54-61); an object description file that stores at least one index (fig. 16, col. 27, lines 7-33); a user input device that selects at least one item of the at least one index (col. 12, lines 1-8); and an association device that associates the selected at least one item with the recording of an activity (fig. 16). However, Fujita et al does not disclose a playback system for replaying an indexed recording that allows simultaneous recording of an activity while

replaying an indexed recording; and further comprising a recording system that records the activity and an audio/video storage device that stores a recorded activity.

Russo et al teaches a playback system that allows replaying of an indexed recording while simultaneously recording an activity to an audio/video storage device (col. 4, lines 1-43). Russo et al teaches that the device is able to continuously record incoming video while “time-shifting” video. For example, a user is able to view five minutes back into recorded video while the video signal is still being recorded (VCRs would require the user to wait until recording is complete to view previously recorded video data).

It would have been highly desirable to allow playback of an index while simultaneously recording an activity so that the user does not have to wait until recording is complete to view the recorded data.

Therefore, it would have been highly desirable to allow playback of an index while recording in the device of Fujita et al.

Regarding claims 6 and 15, Fujita et al discloses a playback system for replaying an indexed recording, wherein the playback system can replay a portion of the indexed recording in response to selecting an item from the index (col. 24, line 20 – col. 25, line 11).

Regarding claims 8-9 and 17-18, Fujita et al discloses displaying at least one of the at least one index, the at least one item and the recording (fig. 15); and wherein the association device temporally associates the recording of an activity with the selected at least one item.

Regarding claims 19-21, Fujita et al discloses recording audio, video, and multimedia (1702, fig. 17).

3. Claims 3, 7, 12, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fujita et al in view of Russo et al and Mincy et al (6,052,508).

Regarding claims 3, 7, 12, and 16, Fujita et al does not disclose an editing system that allows a recorded activity to be inserted into a current recording.

Mincy et al teaches an editing system that allows a recorded activity to be inserted into a current recording (col. 22, lines 50-59).

It would have been highly desirable to have an editing device allowing insertion of a previous recording into a current recording so that a desired video output can be produced.

Therefore, it would have been obvious to a person of ordinary skill in the art at the time of the invention to have an editing system that allows a previous recording to be inserted into a current recording in the device of Fujita et al.

Conclusion

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
